

Emergency Conservation Assistance Program (ECAP)

Critical Area Application

2009

The District will pay 50% of costs incurred to stabilize critical areas that have eroded. The practice must meet NRCS Field Office Tech Guide Standard and Spec. Grading, seeding, mulching and rock are some of the approved methods of stabilizing. The practice must be completed by September 15, 2009.

NOTE: There is a \$1000.00 cap for each landowner.
